

Rat and Mouse Thermometer

—The Optimal Choice for Medical Research

Advantages

- Miniaturized wearable thermometer for in-body/rectal/ear canal measurement
- Continuous and dynamic measurement of real core body temperature
- Monitor temperature measurement data of mice using mobile phones

Features

- Measuring range: 25.0°C – 45.0°C
- Measuring accuracy: $\pm 0.1^\circ\text{C}$
- Measurement rate: 10 seconds
- Recording interval: 5 minutes

Applications

- Biomedical research
- Pharmacological and pathological research
- Disease modeling / Drug efficacy evaluation
